"...The thing I really like about teaching students is it reminds me ...of how neat and how special teaching is.... It got to the point where I could see through the student's eyes and remember how special it was to learn. This graduating class is special. I heard what they wanted to do through the admissions office, what their aspirations were. It's so great to see it all come together and be happening for them. I believe in this class. They are people who I would want to take care of me, and I feel like I have been a part of that."
